

12 good reasons to choose Natural Fertility Treatment over IVF/conventionally assisted conception

Natural Fertility has a **far higher success rate**

Natural Fertility is an option for those **who don't qualify for funded IVF, have failed with IVF or just can't face IVF**

Natural Fertility may be best for those who have **unexplained infertility**

Natural Fertility offers timely help to those who have **suffered miscarriage**

Natural Fertility has **successful patients with a conventional diagnosis that would normally make pregnancy unlikely** like thyroid imbalance or endometriosis

Natural Fertility considers individual **"fertility age"** not random NICE guidelines or national averages

Natural Fertility is a **team affair, for men too** – even busy ones who can only get to an initial Natural Fertility Assessment.

Natural Fertility is based on broader and deeper functional testing to map deviation from homeostasis/optimal fertility. We are able to identify the **underlying cellular level causative factors of blocks to fertility** which would not be considered in the conventional model.

Natural Fertility involves **NO toxic drugs and side effects** and instead uses bespoke, highest quality supplements and nutrition

Natural Fertility has a **normal rate of multiple births**. The IVF rate is 20 x higher than normal.

Natural Fertility may be **better for both parent's and baby's health**

Natural Fertility Treatment is a much more **pleasant and nurturing experience** with a supportive team and no invasive procedures

ACTION; If any, some or all of these reasons mean that you would like to progress Natural Fertility then please book a Natural Fertility Assessment – for one or both partners
